

Questions

PURCHASE AND DELIVERY OF 32-PASSENGER CUTAWAY SHUTTLE BUSES FOR SPECIAL TRANSPORTATION SERVICE

date: 12/27/2023

	QUESTION	RESPONSE
1	went to some of the properties today and was looking over them and measuring them, but in the bid it asks in the spring and fall clean ups that we seed any areas that need it, but the only problem is, is that if i give a price now and something happens like snow damage or a car runs the grass over and turfs the grass ect that wouldn't be covered under the price im giving you today, it's just hard to say what each property will need seeded in future is what im trying to say. and i also wanted to know if that means just seed or top dressing the areas? because that would up the price due to the topsoil.	The snow vendor is responsible for damaged cause by a plow blade. If bare spots in the lawns are found, the winning vendor will submit a plan for reseeding, fertilization, and watering along with cost estimate to Laketran's project manager.
2	Oh one more thing have you thought about maybe just adding 2 inches of mulch to the beds in spring and about 1 inch on the second round it save a lil money in long run and it ends up freshening it up really nice with just the extra inch the second time around	If you would like to propose changes to the scope of work, please describe how and why in your proposal. And provide a price for the work.
3	Question regarding area near Mentor park and ride location on Market Street: around the corner from the lot, there is a small shelter that is located near the driveway that pulls into the Mentor High School stadium lot (on Munson across from the Mentor City Hall parking lot). I noticed that it has some shrubbery and looks well maintained. Is this an area maintained by the city or the school versus Laketran's most recent grounds maintenance vendor	Mentor High School is responsible for maintaing this site.
